

# Pluggable Transceivers

## Small Form-Factor Pluggable Transceivers

SFP (Small Form-factor Pluggable) transceivers (SFPs) are hot-swappable optical and electrical transceiver units, each providing a different interface according to known compliance standards and pre-determined specifications. The units are plugged into host platforms to provide the required interface, thus enabling optimal combination of CAPEX and OPEX reduction, due to ease of network planning, management, maintenance, and stock flexibility.

RAD's Pluggable transceivers are fully compliant with the Multisource Agreement (MSA) specifications and are interoperable with third-party standards-based devices.

Built-in digital diagnostic monitoring (DDM) functionality is available for designated SFP types, allowing users to monitor the unit's transmitter optical output power, receiver input optical power, internal temperature, supply voltage and transmitter bias current levels in real-time.

The XFP and SFP+ are transceivers designed for 10G network applications.

QSFP28 transceiver modules are designed for use in 100 Gigabit Ethernet links over multimode or single-mode fibers.

QSFP+ transceiver modules are designed for use in 40 Gigabit Ethernet links over multimode or single-mode fibers.

### Specifications

#### FIBER OPTIC INTERFACES

##### Notes:

- Commercial Pluggable Transceivers are designed to withstand temperatures between 0–70°C (32–158°F).
- Some of RAD's Pluggable Transceivers are available with extended temperature range between -20–85°C (-4–185°F) or in industrially hardened versions, designed to withstand temperatures between -40–85°C (-40–185°F).
- The specified typical range may vary according to the specific product in which the SFP/XFP/SFP+/QSFP28 is used. For more information, refer to the data sheet of the specific product.

Table 1. Fiber Optic Fast Ethernet/STM-1/STM-4 SFPs

Ordering Name, Interface, Connector	Wavelength, Fiber Type [nm], [μm]	Standards	Transmitter Type	Input Power [dBm]		Output Power [dBm]		Typical Max. Range	
				[min]	[max]	[min]	[max]	[km]	[miles]
<b>SFP-2DH*</b> Fast Ethernet/STM-1, LC	1310, 9/125 single mode	100BASE-LX10, IEEE 802.3 (FE), G.957 S1.1 (STM-1)	Laser	-28	-8	-15	-8	15	9.3

## Small Form-Factor Pluggable Transceivers

### Ordering

To order an SFP/XFP/SFP+/QSFP+/QSFP28 unit, use its ordering name as listed in *Tables 1–7*.

**Note:** *It is strongly recommended to order RAD products with original RAD SFP/XFP/SFP+/QSFP+/QSFP28 installed. This will ensure that prior to shipping, RAD has performed comprehensive functional quality tests on the entire assembled unit, including the SFP/XFP/SFP+/QSFP28 devices.*

*RAD cannot guarantee full compliance to product specifications for products using non-RAD SFPs/XFPs/SFP+s/QSFP28.*

### SUPPLIED ACCESSORIES

#### CBL-MINIBNC-BNC

Two adapter cables for converting mini BNC connectors to regular BNC coaxial connectors (for SFP-11)

#### CBL-MINIBNC/PP-BNC

Two adapter cables for converting mini BNC Push-Pull connectors to regular BNC coaxial connectors (for SFP-11/PP)

#### International Headquarters
